Personal Summary

Architecturally trained BIM Specialist and Full Stack Software Developer with a multidisciplinary background in design technology, software engineering, and cloud-based automation. Demonstrated expertise in building .NET applications with AI integration, developing Revit and AutoCAD API tools, and deploying full-stack web solutions using C#, WPF, JavaScript, PHP, and MySQL. Proficient in crafting custom Revit Add-ins, Dynamo scripts, and parametric families to enhance BIM workflows and documentation standards. Experienced in configuring AWS environments and developing user-centric UI/UX interfaces. Recognized for bridging the gap between architecture and software, with a strong aptitude for innovation, technical leadership, and cross-functional collaboration in agile, remote teams.

Skills

- | | |
|--|--|
| • Cross-Disciplinary Adaptability | • Minimal Framework Development |
| • Parametric Family Modeling in Revit | • Design Thinking |
| • Remote Collaboration & Mentorship | • Self-Driven Learning & Growth |
| • AI Integration in BIM Workflows | • Full Stack Desktop & Web Development |
| • Custom Revit Add-in Development | • Technical Communication |
| • Cloud-Based Application Deployment (AWS & NGINX) | • Client-Focused Problem Solving |
-

Experience

BIM Full Stack Developer in .NET and AI	03/2024 to 04/2025
Avant Leap	Merida State, Venezuela

- Designed, developed, and maintained Revit Add-ins, Dynamo scripts, and standalone applications (.dll and .exe), ensuring scalability, performance, and adherence to software development best practices.
- Integrated Artificial Intelligence (AI) solutions into Revit and Windows-based workflows to enhance automation, productivity, and user experience.
- Leveraged a wide range of technologies including .NET Framework, WPF, Windows Forms, Python, Inno Setup, AWS, and SQL Server for full-cycle software development and deployment.

Full Stack Web Developer & UI/UX Designer	10/2023 to 03/2024
Udemy	Merida State, Venezuela

- Led end-to-end design, development, deployment, and ongoing maintenance of multiple websites, including scalaa.com, theinspiratagroup.com, thedalessiogroup.com, and eduardoos.com.
- Developed and implemented responsive, user-centric web interfaces using HTML, CSS, JavaScript, and PHP, optimizing for performance and accessibility.
- Built and maintained custom backend functionality using MySQL and a proprietary Minimal Framework to ensure scalability, security, and maintainability.

.NET Developer for Revit API	03/2023 to 09/2023
BIMIQs Miami	Merida State, Venezuela

- Planned, designed, and developed custom plugins and automation scripts for Revit and AutoCAD using .NET and C# to streamline architectural and engineering workflows.
- Utilized WPF for creating user-friendly interfaces and ADO.NET with MySQL for efficient data management and integration.
- Ensured compatibility, performance optimization, and maintainability of solutions across multiple Autodesk platforms.

- Created detailed building models and parametric Revit families using native Revit tools and API scripting to support architectural and MEP workflows.
- Produced precise documentation for electrical rooms and equipment kits in Revit 2022, adhering to industry standards and project specifications.
- Developed automation scripts using C# and Dynamo-Python to optimize and streamline repetitive tasks within Revit, enhancing productivity and accuracy..

Education

Advanced BIM Modeling Course**12/2023**

BIMMASTER.org

Full Stack Web Development Course**12/2022**

Udemy

Bachelor of Architecture**12/2017**

Universidad de Los Andes

GPA: Cum Laude

Master in BIM**12/2011**

Aitec
